EDUCATION

2023 – 2025 **JKC College Guntur**
Guntur, India Masters Of Computer Applications - 81%

2020 – 2023 **Sri Rohini Degree College**
chilakaluripet, india Bachelor of science - 77%

PROJECTS

QR CODE BASED ATTENDANCE SYSTEM

A Smart Attendance Monitoring System using Python and QR Code Technology

Developed a smart attendance management system using Python, OpenCV, and MySQL that generates and scans QR codes for employee identification. The system enhances classroom efficiency by automating attendance tracking, reducing time consumption and human error. Integrated face verification and real-time database updates to improve security and accuracy.

Mobile Price Prediction System

Mobile Price Prediction System Python, Scikit-Learn, Pandas, Seaborn, Matplotlib, PCA, GridSearchCV Developed a regression-based machine learning model to predict mobile phone prices using a custom dataset with features such as RAM, ROM, camera specs, and battery capacity. Implemented multiple models including Linear Regression, Random Forest, Gradient Boosting. Applied PCA for dimensionality reduction and GridSearchCV for hyperparameter tuning. Achieved optimized prediction performance evaluated using R^2 score and MSE.

ADDITIONAL

Languages

Telugu, English

CERTIFICATES

- Python for Beginners – NxtWave Academy
- SQL Fundamentals – NxtWave Academy
- MOOCs on E-Commerce – ANU College

SKILLS

- Python (Numpy, Pandas)
- Data Visualization (Matplotlib, Seaborn, EDA)
- SQL
- Machine Learning (Supervised & Unsupervised)
